

### **Mojo Concrete Color Sample Policies:**

Mojo Concrete has in house capability to produce the colors in the Scofield Systems Chromix Admixtures color palette with the exception of c-31 (shadow slate). These colors are integral colors (concrete is colored all the way through) and are designated as Standard Colors for pricing and lead time considerations. Color brochures are available for viewing at Mojo Concrete's Rochester Showroom.

Mojo Concrete works with a company that provides pigments specifically designed for concrete that allow the production of any color in the Benjamin Moore paint color wheel. These colors are integral colors (concrete is colored all the way through) and are designated as Custom Colors for pricing and lead time considerations. The Benjamin Moore Color Wheel is available for viewing at Mojo Concrete's Rochester Showroom, or at Benjamin Moore paint retailers.

In addition to the integral colors described above, concrete pieces can be stained using Scofield Systems Lithochrome Chemstain Classic acid stains. Acid staining colors only a thin surface layer of the concrete. Samples produced using acid stains are designated as Custom Colors for pricing and lead time considerations. Color brochures are available for viewing at Mojo Concrete's Rochester Showroom.

Samples that are 12" x 12" x 3/4" can be ordered to preview the specific color and finish being considered for a particular project. Samples may be finished with either sealing system offered by Mojo Concrete. Samples are typically ground heavily on one half and very lightly on the other half. This displays aesthetic variation possible with different amounts of aggregate exposed.
